TO the people that are trying to block what I already receive:  
I have XM radio in both my 18 wheeler and my wife's car. It seems to me that like cable tv, if you pay a monthly fee you should have the freedom to listen or see any available station the company has to offer, and they should have the freedom to offer anything that is available or they can dream up. This is America, not China. What right does any organization or person have to tell a provider what they can or cannot carry. Again I remind you, this is America, not a communist country. I say stop your bickering and bud out. As a trucker I use the weather and traffic stations several times a day everyday. No one offers better coverage. And if I pay, it is my right as an American to receive it over the satellite waves.

To XM Radio:

Keep up the great work guys, what you offer me in my vehicle is better than anything I have ever received over FM or AM radio waves. I am proud to be an American that has the right and freedom to listen and buy your product. Thankyou and keep fighting for what is right.

Matt Boren
